SPRING CLEAN WITH ZINOGENE+

ZinoGene+ is the cutting-edge innovation for food supplements. A scientific breakthrough based on a complex formulation of fucoidans; a natural polysaccharide from seaweed, polyphenols, vitamin C and zinc that supports DNA synthesis and cell division. The accumulation of dysfunctional cells and decline in regeneration are inherent parts of the aging process. The rate at which this takes place is affected by the content of nutrition in our food. This is why we developed ZinoGene+.
